Graphing Solutions to:

Graphing Solutions to:

Example: Graph solutions to the equation:
$$y = |3x - 1|$$

Graphing Solutions to:

Example: Graph solutions to the equation:
$$y = |3x - 1|$$
we first graph the equation without Absolute Values.

Graphing Solutions to:

Example: Graph solutions to the equation:
$$y = |3x - 1|$$
we first graph the equation without Absolute Values.
$$y = 3x - 1$$

Graphing Solutions to:

Example: Graph solutions to the equation:
$$y = |3x - 1|$$
we first graph the equation without Absolute Values.
$$y = 3x - 1$$
To sketch the line, we need to find the

# Graphing Solutions to:

Example: Graph solutions to the equation:
$$y = |3x - 1|$$
we first graph the equation without Absolute Values.
$$y = 3x - 1$$
To sketch the line, we need to find the
$y-$int: $x = 0$

Graphing Solutions to:
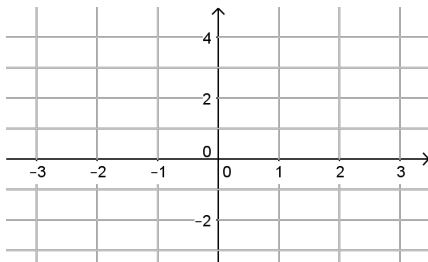

Example: Graph solutions to the equation:
$$y = |3x - 1|$$
we first graph the equation without Absolute Values.
$$y = 3x - 1$$
To sketch the line, we need to find the
$y-$int: $x = 0$
$y = 3 \cdot 0 - 1$

Graphing Solutions to:
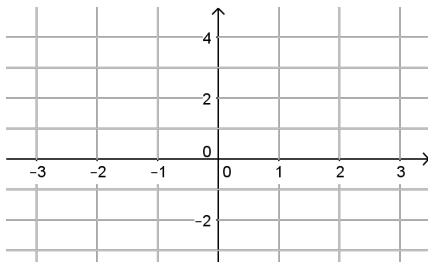

Example: Graph solutions to the equation:
$$y = |3x - 1|$$
we first graph the equation without Absolute Values.
$$y = 3x - 1$$
To sketch the line, we need to find the
$y-$int: $x = 0$
$y = 3 \cdot 0 - 1 = -1$

Graphing Solutions to:
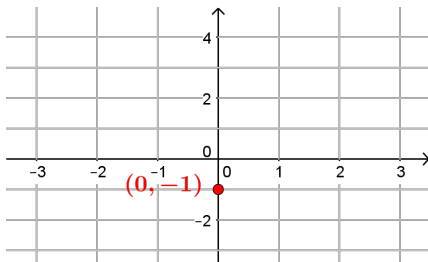

Example: Graph solutions to the equation:
$$y = |3x - 1|$$
we first graph the equation without Absolute Values.
$$y = 3x - 1$$
To sketch the line, we need to find the
$y-$int: $x = 0$
$y = 3 \cdot 0 - 1 = -1 \rightarrow (0, -1)$

Graphing Solutions to:

Example: Graph solutions to the equation:
$$y = |3x - 1|$$
we first graph the equation without Absolute Values.
$$y = 3x - 1$$
To sketch the line, we need to find the

$y-$int: $x = 0$

$y = 3 \cdot 0 - 1 = -1 \rightarrow (0, -1)$

$x-$int: $y = 0$

Graphing Solutions to:

Example: Graph solutions to the equation:
$$y = |3x - 1|$$
we first graph the equation without Absolute Values.
$$y = 3x - 1$$
To sketch the line, we need to find the
$y-$int: $x = 0$
$y = 3 \cdot 0 - 1 = -1 \rightarrow (0, -1)$
$x-$int: $y = 0$
$0 = 3 \cdot x - 1$

Graphing Solutions to:

Example: Graph solutions to the equation:
$$y = |3x - 1|$$
we first graph the equation without Absolute Values.
$$y = 3x - 1$$
To sketch the line, we need to find the

y−int: $x = 0$

$y = 3 \cdot 0 - 1 = -1 \rightarrow (0, -1)$

x−int: $y = 0$

$0 = 3 \cdot x - 1 \Leftrightarrow 1 = 3x$

Graphing Solutions to:

Example: Graph solutions to the equation:
$$y = |3x - 1|$$
we first graph the equation without Absolute Values.
$$y = 3x - 1$$
To sketch the line, we need to find the

$y-$int: $x = 0$

$y = 3 \cdot 0 - 1 = -1 \rightarrow (0, -1)$

$x-$int: $y = 0$

$0 = 3 \cdot x - 1 \Leftrightarrow 1 = 3x \Leftrightarrow x = \frac{1}{3}$

Graphing Solutions to:

Example: Graph solutions to the equation:
$$y = |3x - 1|$$
we first graph the equation without Absolute Values.
$$y = 3x - 1$$
To sketch the line, we need to find the
$y-$int: $x = 0$
$y = 3 \cdot 0 - 1 = -1 \rightarrow (0, -1)$
$x-$int: $y = 0$
$0 = 3 \cdot x - 1 \Leftrightarrow 1 = 3x \Leftrightarrow x = \frac{1}{3} \rightarrow \left(\frac{1}{3}, 0\right)$

Graphing Solutions to:

Example: Graph solutions to the equation:
$$y = |3x - 1|$$
we first graph the equation without Absolute Values.
$$y = 3x - 1$$
To sketch the line, we need to find the

$y-$int: $x = 0$

$y = 3 \cdot 0 - 1 = -1 \rightarrow (0, -1)$

$x-$int: $y = 0$

$0 = 3 \cdot x - 1 \Leftrightarrow 1 = 3x \Leftrightarrow x = \frac{1}{3} \rightarrow \left(\frac{1}{3}, 0\right)$

Using the intercepts, we can sketch the graph of the line

Graphing Solutions to:

Example: Graph solutions to the equation:
$$y = |3x - 1|$$
we first graph the equation without Absolute Values.
$$y = 3x - 1$$
To sketch the line, we need to find the

$y-$int: $x = 0$

$y = 3 \cdot 0 - 1 = -1 \to (0, -1)$

$x-$int: $y = 0$

$0 = 3 \cdot x - 1 \Leftrightarrow 1 = 3x \Leftrightarrow x = \frac{1}{3} \to \left(\frac{1}{3}, 0\right)$

Using the intercepts, we can sketch the graph of the line

Taking the absolute value will make all $y-$values positive

Graphing Solutions to:

Example: Graph solutions to the equation:
$$y = |3x - 1|$$
we first graph the equation without Absolute Values.
$$y = 3x - 1$$
To sketch the line, we need to find the
$y-$int: $x = 0$
$y = 3 \cdot 0 - 1 = -1 \rightarrow (0, -1)$
