Graphing Rational Functions - General

Graphing Rational Functions - General

- We have seen how to sketch the basic graph $f(x) = \frac{1}{x}$

Graphing Rational Functions - General

- We have seen how to sketch the basic graph $f(x) = \frac{1}{x}$
- Using Graph Shifting we sketched the graph of $f(x) = \frac{1}{x-1}$

Graphing Rational Functions - General

- We have seen how to sketch the basic graph $f(x) = \frac{1}{x}$
- Using Graph Shifting we sketched the graph of $f(x) = \frac{1}{x-1}$

How do we sketch the graph of a Rational Function in general?

$$f(x) = \frac{P(x)}{D(x)}$$

Graphing Rational Functions - General

▸ We have seen how to sketch the basic graph $f(x) = \frac{1}{x}$

▸ Using Graph Shifting we sketched the graph of $f(x) = \frac{1}{x-1}$

How do we sketch the graph of a Rational Function in general?

$$f(x) = \frac{P(x)}{D(x)}$$

▸ We saw that if $D(a) = 0$ and $P(a) \neq 0$ then $f(x)$ has a vertical asymptote at $x = a$

Graphing Rational Functions - General

We have seen how to sketch the basic graph $f(x) = \frac{1}{x}$

Using Graph Shifting we sketched the graph of $f(x) = \frac{1}{x-1}$

How do we sketch the graph of a Rational Function in general?

$$f(x) = \frac{P(x)}{D(x)}$$

We saw that if $D(a) = 0$ and $P(a) \neq 0$ then $f(x)$ has a vertical asymptote at $x = a$

Furthermore, we saw that $f(x) \to \pm\infty$ as x gets near a

Graphing Rational Functions - General

▸ We have seen how to sketch the basic graph $f(x) = \frac{1}{x}$

▸ Using Graph Shifting we sketched the graph of $f(x) = \frac{1}{x-1}$

How do we sketch the graph of a Rational Function in general?

$$f(x) = \frac{P(x)}{D(x)}$$

▸ We saw that if $D(a) = 0$ and $P(a) \neq 0$ then $f(x)$ has a vertical asymptote at $x = a$

Furthermore, we saw that $f(x) \to \pm\infty$ as x gets near a

Like, with all of our functions so far, the $x-$ and $y-$intercepts will play important roles in our graph.

Graphing Rational Functions - General

We have seen how to sketch the basic graph $f(x) = \frac{1}{x}$

Using Graph Shifting we sketched the graph of $f(x) = \frac{1}{x-1}$

How do we sketch the graph of a Rational Function in general?

$$f(x) = \frac{P(x)}{D(x)}$$

We saw that if $D(a) = 0$ and $P(a) \neq 0$ then $f(x)$ has a vertical asymptote at $x = a$

Furthermore, we saw that $f(x) \to \pm\infty$ as x gets near a

Like, with all of our functions so far, the $x-$ and $y-$intercepts will play important roles in our graph.

As with polynomials, we will always want to understand the End Behavior of our graph.

Graphing Rational Functions - General

We have seen how to sketch the basic graph $f(x) = \frac{1}{x}$

Using Graph Shifting we sketched the graph of $f(x) = \frac{1}{x-1}$

How do we sketch the graph of a Rational Function in general?

$$f(x) = \frac{P(x)}{D(x)}$$

We saw that if $D(a) = 0$ and $P(a) \neq 0$ then $f(x)$ has a vertical asymptote at $x = a$

Furthermore, we saw that $f(x) \to \pm\infty$ as x gets near a

Like, with all of our functions so far, the $x-$ and $y-$intercepts will play important roles in our graph.

As with polynomials, we will always want to understand the End Behavior of our graph.

Recall: The End Behavior is what happens to $f(x)$ as $x \to \pm\infty$ goes off the left and right hand sides of the graph.

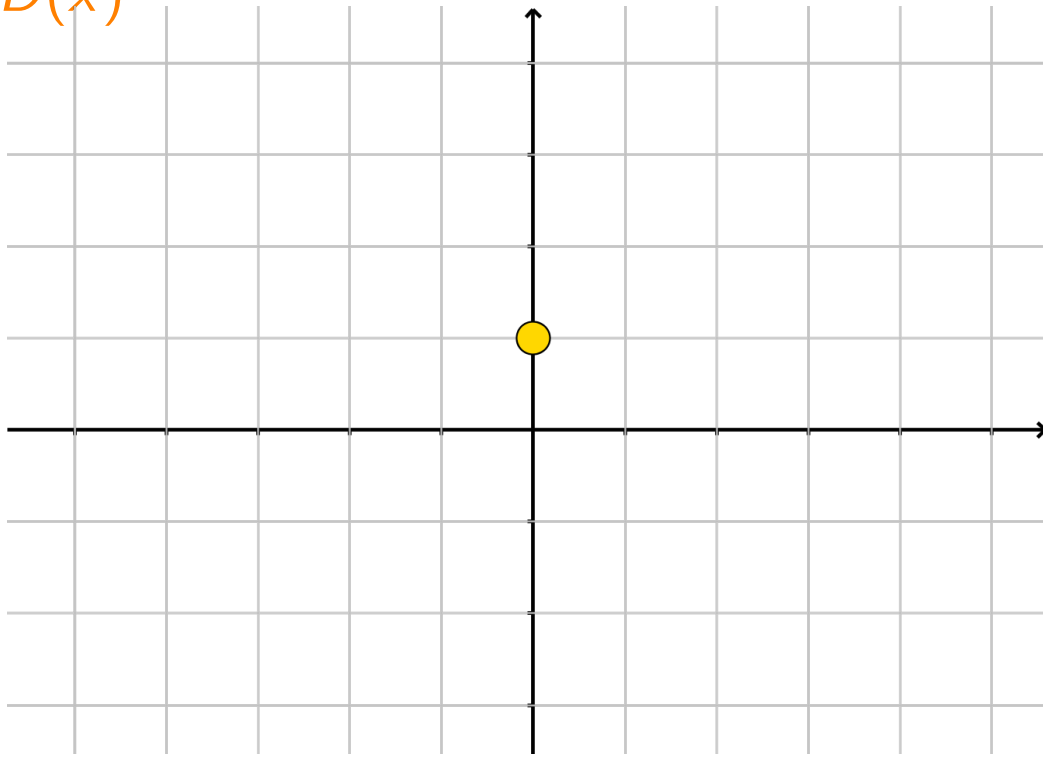
Graphing Rational Functions - General

Graphing Rational Functions - General

To graph a Rational Function:

$$f(x) = \frac{P(x)}{D(x)}$$

We need to find:



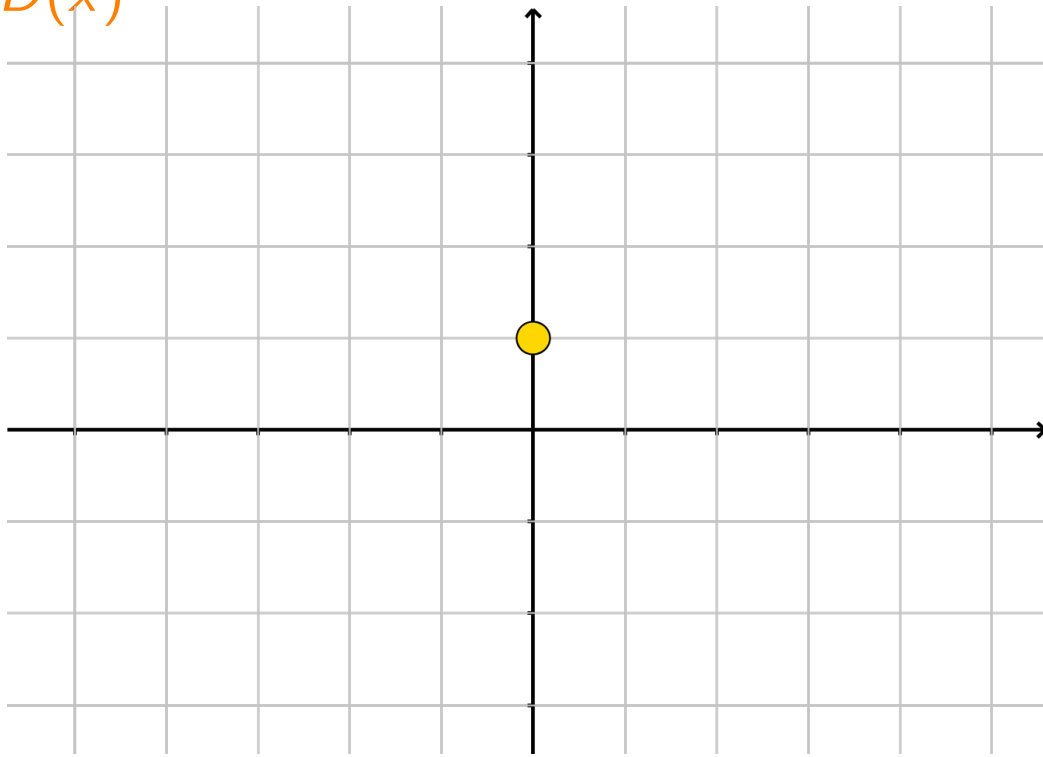
Graphing Rational Functions - General

To graph a Rational Function:

$$f(x) = \frac{P(x)}{D(x)}$$

We need to find:

The $y-$int



Graphing Rational Functions - General

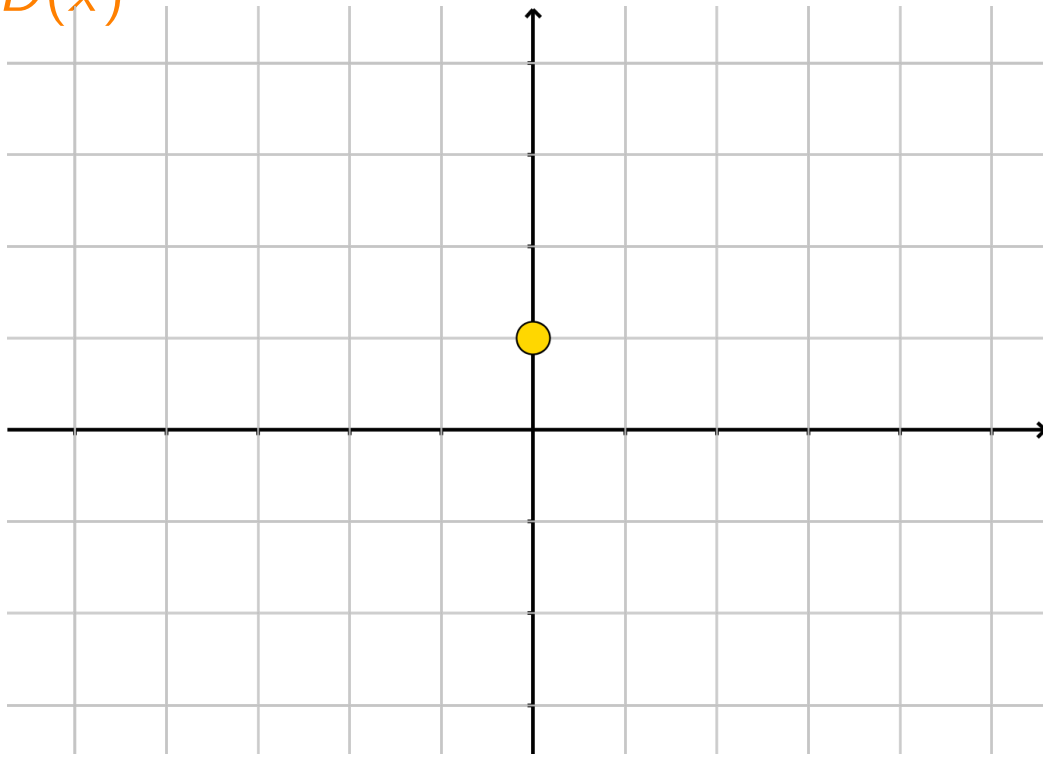
To graph a Rational Function:

$$f(x) = \frac{P(x)}{D(x)}$$

We need to find:

The $y-$int

The $x-$int



Graphing Rational Functions - General

To graph a Rational Function:

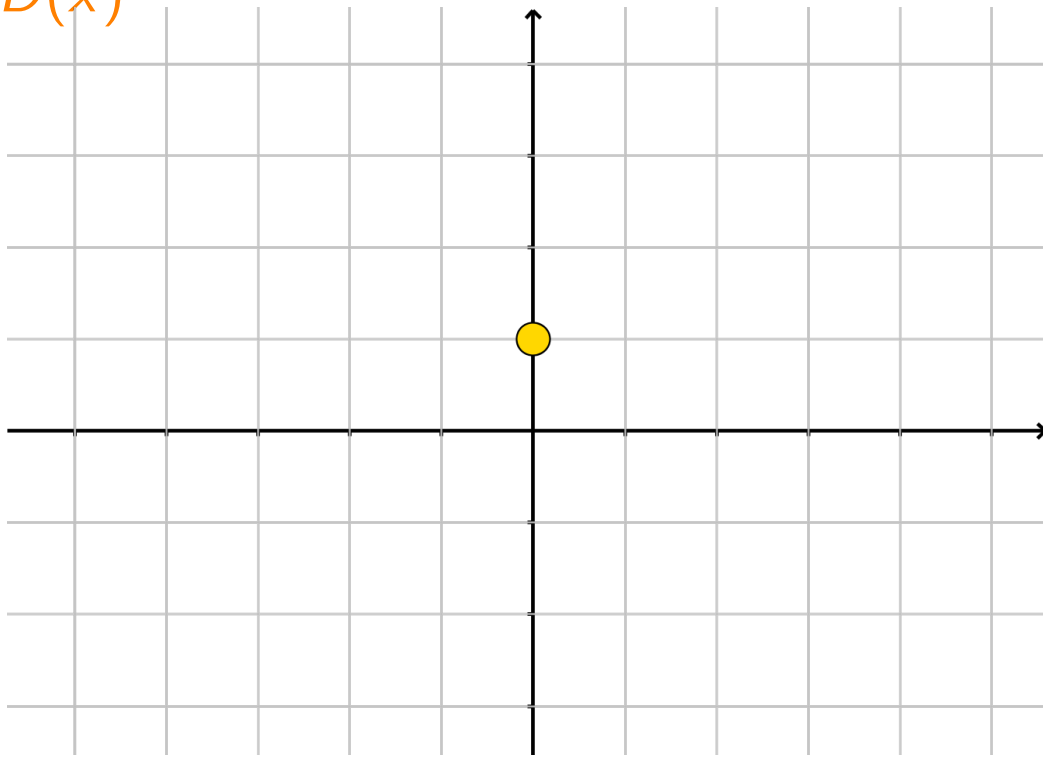
$$f(x) = \frac{P(x)}{D(x)}$$

We need to find:

The $y-$int

The $x-$int

Vertical asymptotes



Graphing Rational Functions - General

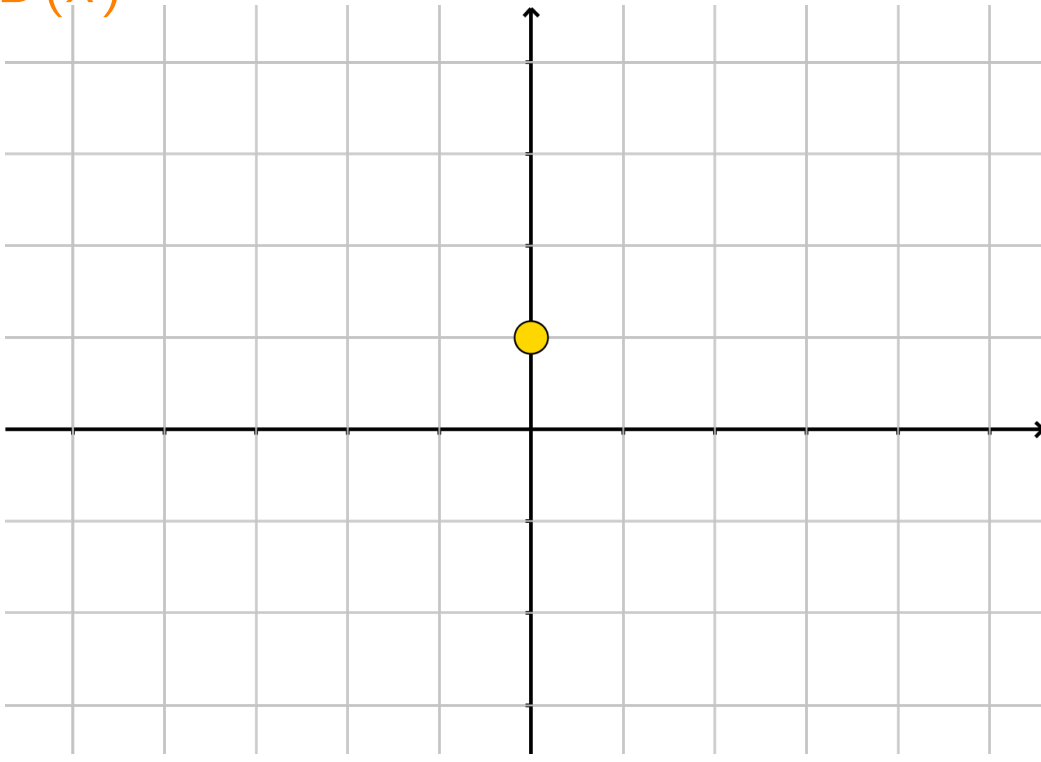
To graph a Rational Function:

$$f(x) = \frac{P(x)}{D(x)}$$

We need to find:

The $y-$int

The $x-$int



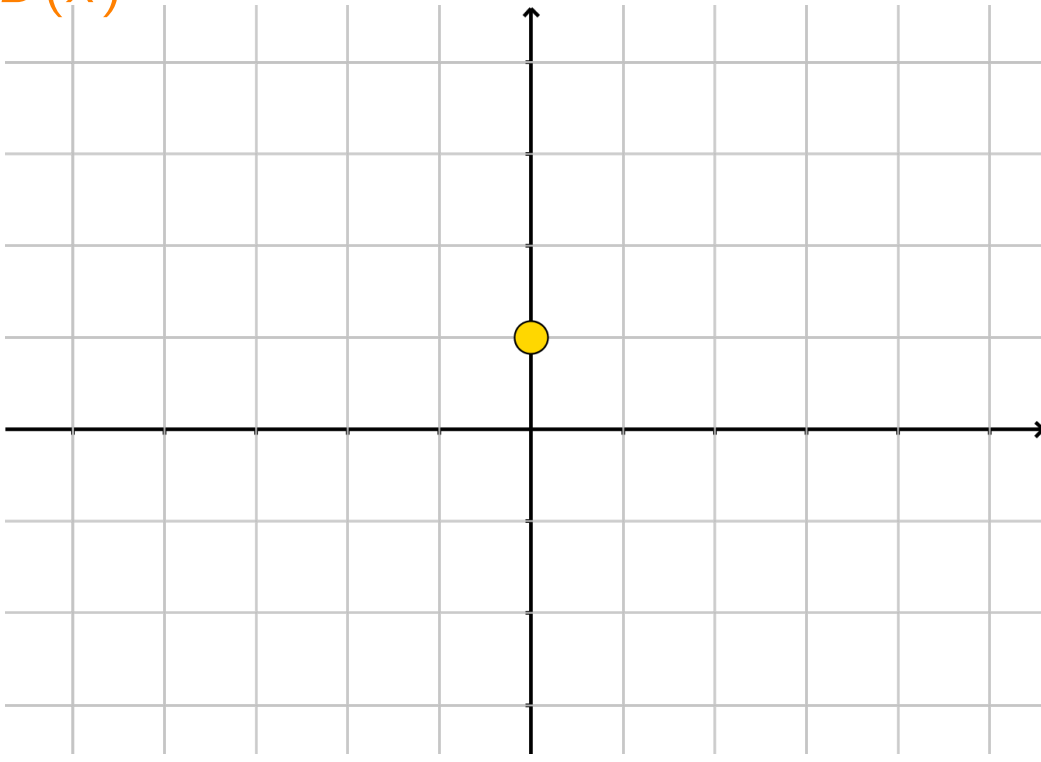
Vertical asymptotes

The End Behavior

Graphing Rational Functions - General

To graph a Rational Function:

$$f(x) = \frac{P(x)}{D(x)}$$



We need to find:

The $y-$int: $x = 0$

The $x-$int

Vertical asymptotes

The End Behavior

Graphing Rational Functions - General

To graph a Rational Function:

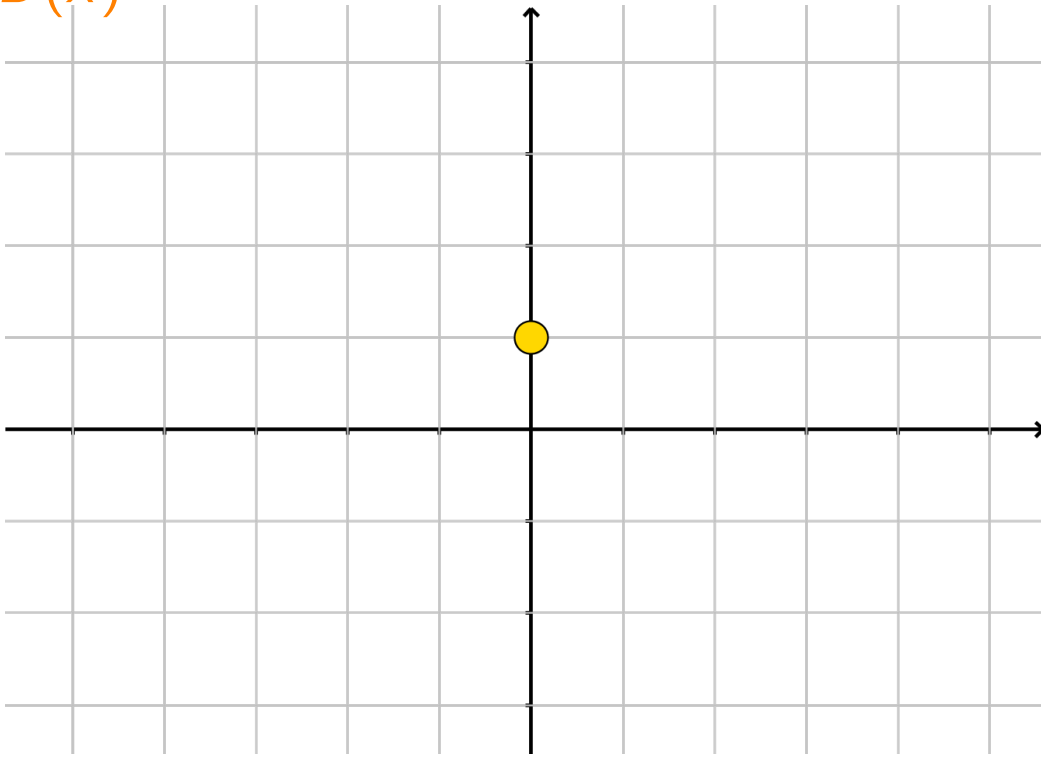
$$f(x) = \frac{P(x)}{D(x)}$$

We need to find:

The $y-$int: $x = 0$

$y = f(0) \rightarrow (0, f(0))$

The $x-$int



Vertical asymptotes

The End Behavior

Graphing Rational Functions - General

To graph a Rational Function:

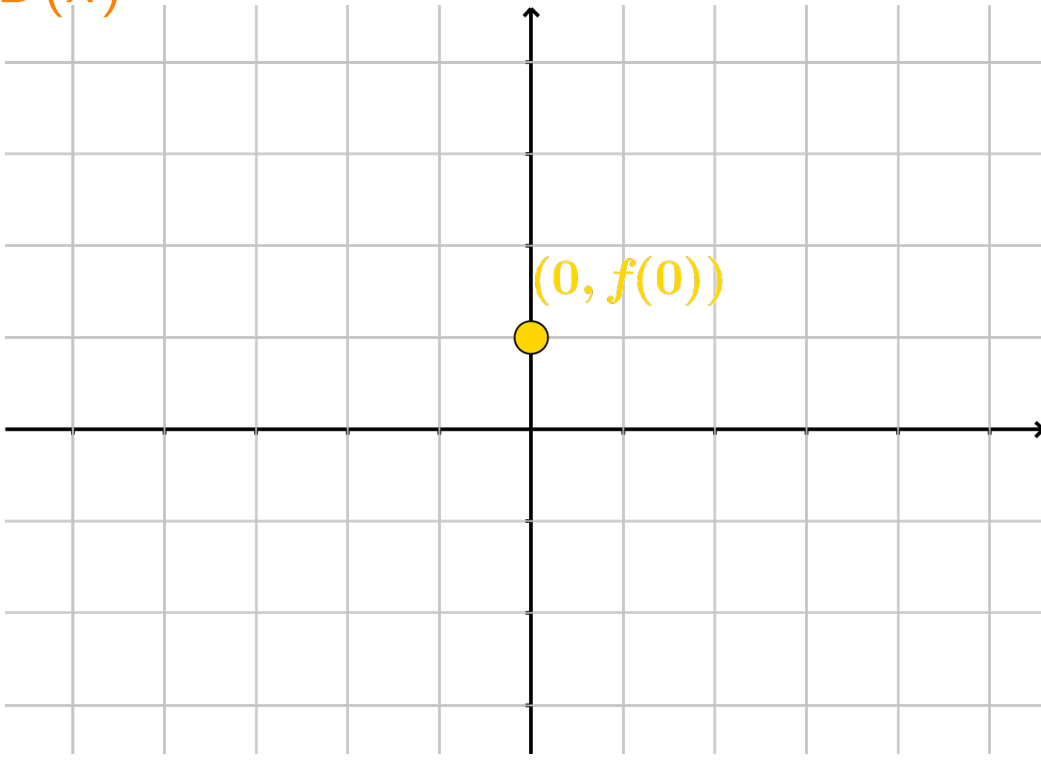
$$f(x) = \frac{P(x)}{D(x)}$$

We need to find:

The $y-$int: $x = 0$

$y = f(0) \rightarrow (0, f(0))$

The $x-$int



Vertical asymptotes

The End Behavior

Graphing Rational Functions - General

To graph a Rational Function:

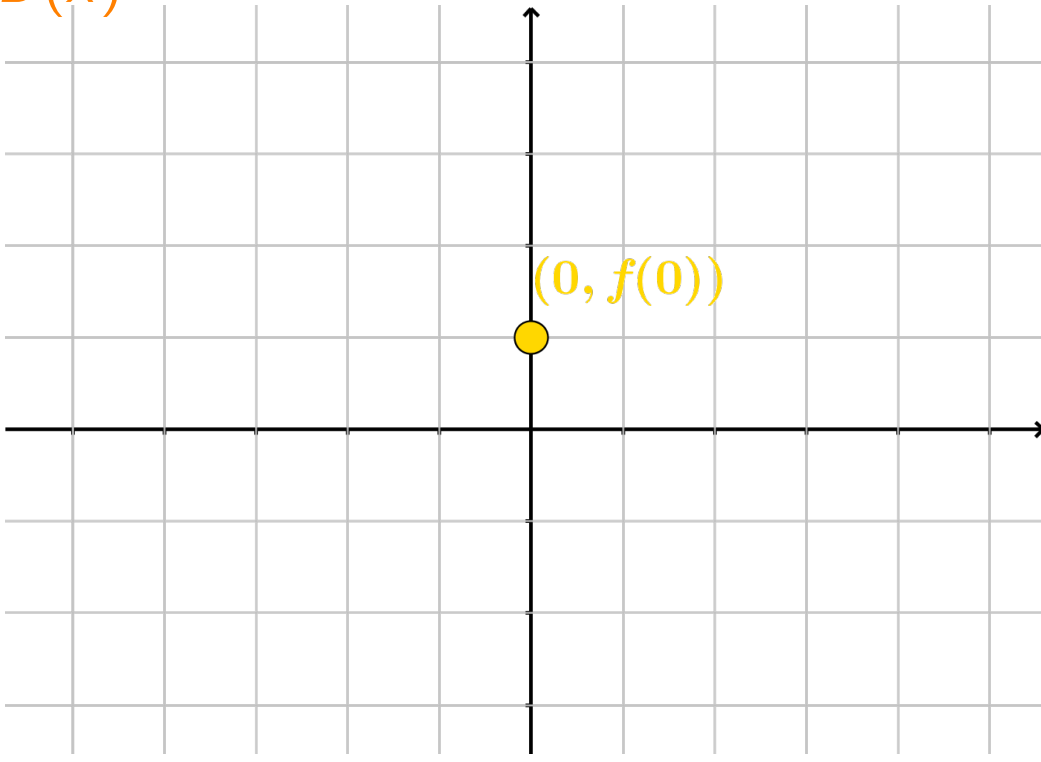
$$f(x) = \frac{P(x)}{D(x)}$$

We need to find:

The $y-$int: $x = 0$

$y = f(0) \rightarrow (0, f(0))$

The $x-$int: $y = f(x) = 0$



Vertical asymptotes

The End Behavior

Graphing Rational Functions - General

To graph a Rational Function:

$$f(x) = \frac{P(x)}{D(x)}$$

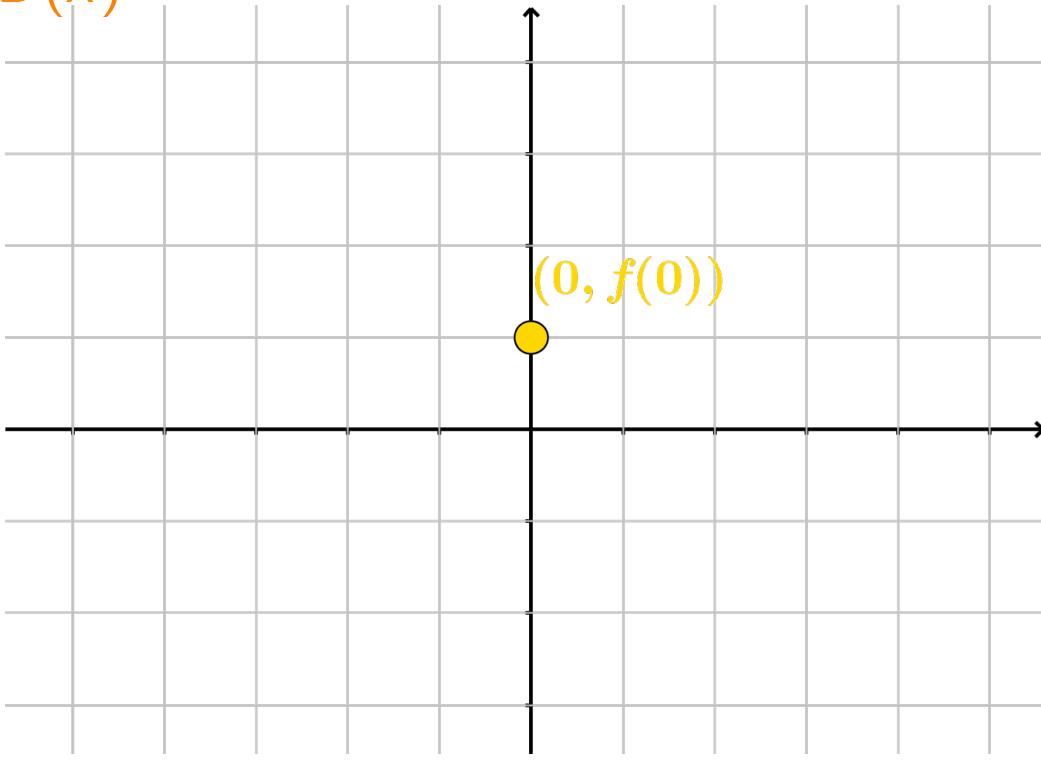
We need to find:

The $y-$int: $x = 0$

$y = f(0) \to (0, f(0))$

The $x-$int: $y = f(x) = 0$

We need to solve $0 = \frac{P(x)}{D(x)}$



Vertical asymptotes

The End Behavior

Graphing Rational Functions - General

To graph a Rational Function:

$$f(x) = \frac{P(x)}{D(x)}$$

We need to find:

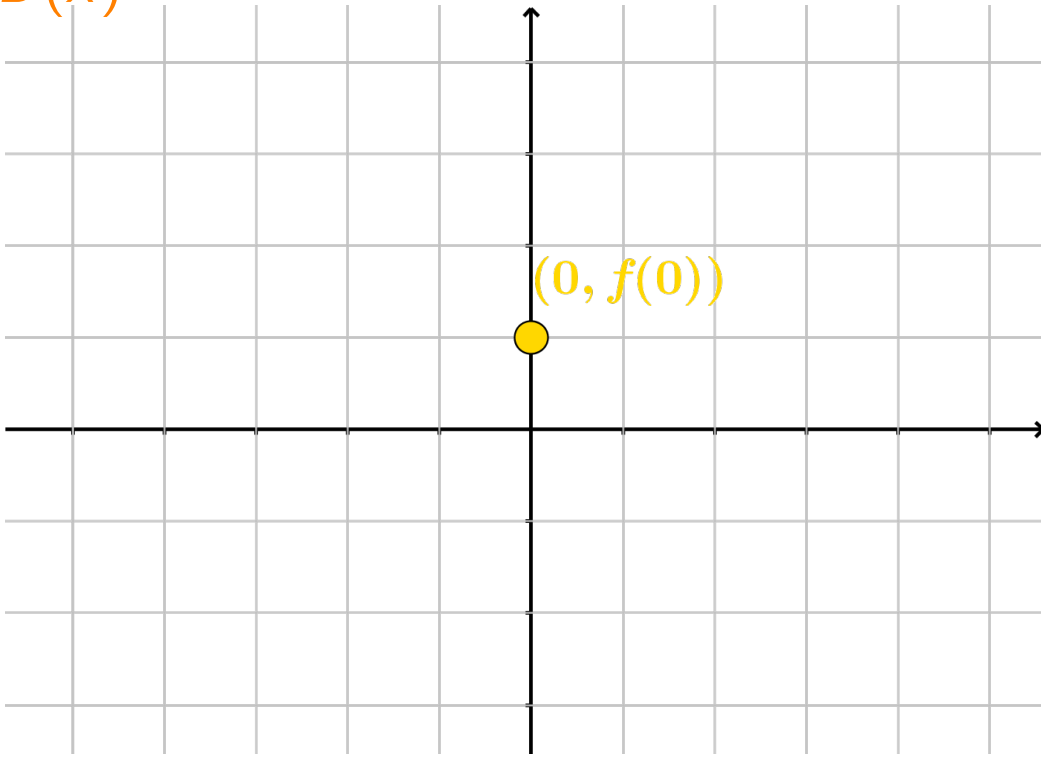
The $y-$int: $x = 0$

$y = f(0) \to (0, f(0))$

The $x-$int: $y = f(x) = 0$

We need to solve $0 = \frac{P(x)}{D(x)}$

We can by solving: $0 = P(x)$



Vertical asymptotes

The End Behavior

Graphing Rational Functions - General

To graph a Rational Function:

$$f(x) = \frac{P(x)}{D(x)}$$

We need to find:

The $y-$int: $x = 0$

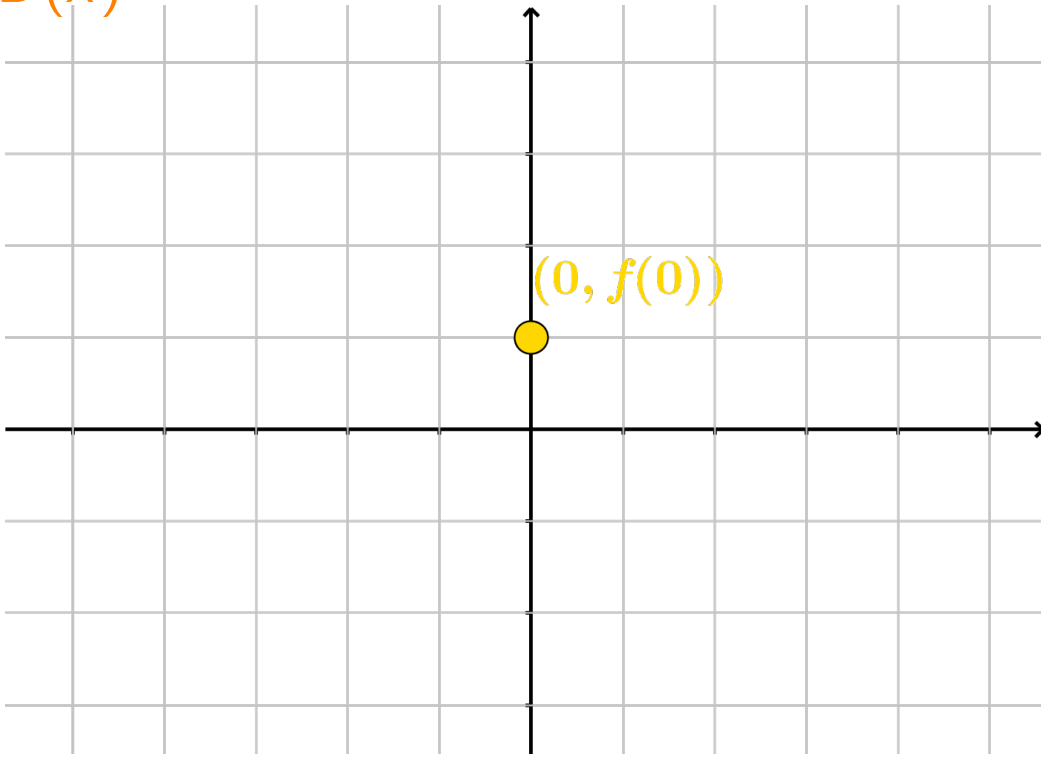
$y = f(0) \to (0, f(0))$

The $x-$int: $y = f(x) = 0$

We need to solve $0 = \frac{P(x)}{D(x)}$

We can by solving: $0 = P(x)$

This gives: $x = k_1, k_2, etc \ldots$



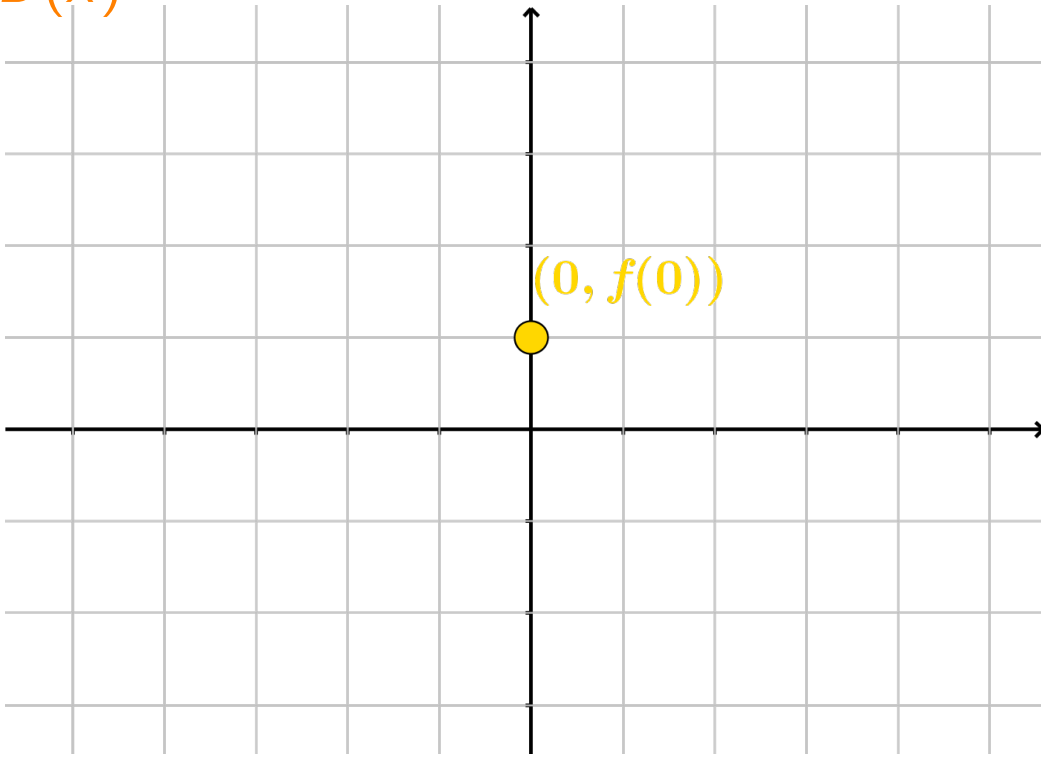
Vertical asymptotes

The End Behavior

Graphing Rational Functions - General

To graph a Rational Function:

$$f(x) = \frac{P(x)}{D(x)}$$



We need to find:

The $y-$int: $x = 0$

$y = f(0) \rightarrow (0, f(0))$

The $x-$int: $y = f(x) = 0$

We need to solve $0 = \frac{P(x)}{D(x)}$

We can by solving: $0 = P(x)$

This gives: $x = k_1, k_2, etc \ldots$

$(k_1, 0), (k_2, 0), etc \ldots$

Vertical asymptotes

The End Behavior

Graphing Rational Functions - General

To graph a Rational Function:

$$f(x) = \frac{P(x)}{D(x)}$$

We need to find:

The $y-$int: $x = 0$

$y = f(0) \rightarrow (0, f(0))$

The $x-$int: $y = f(x) = 0$

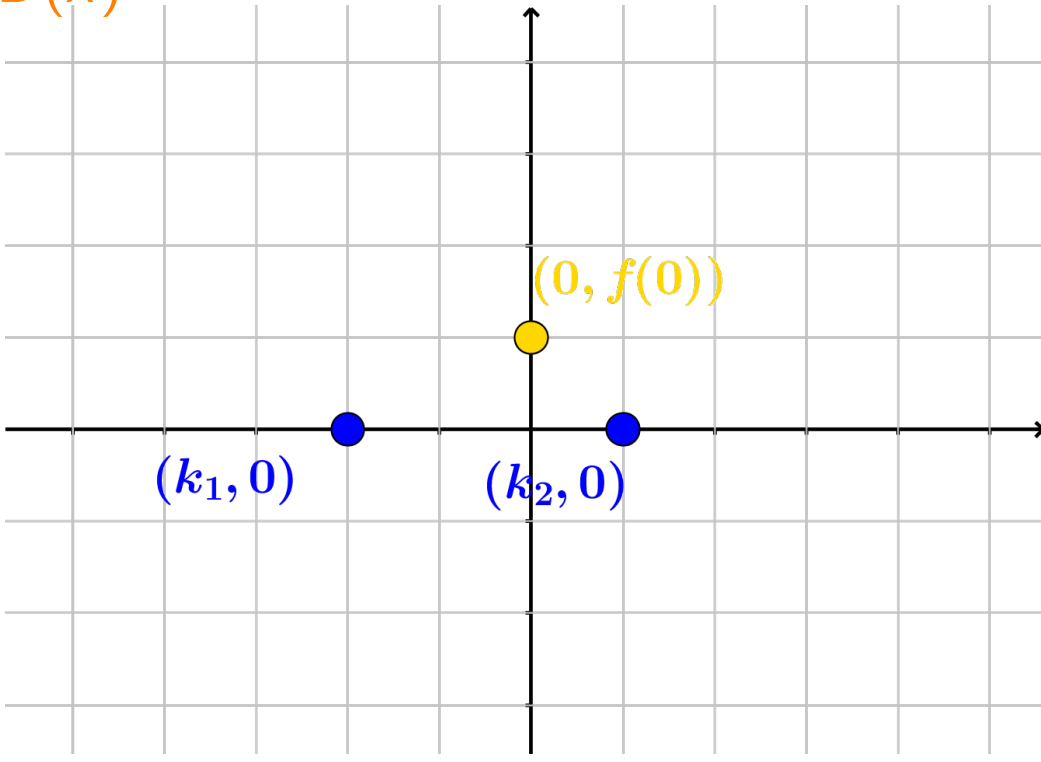
We need to solve $0 = \frac{P(x)}{D(x)}$

We can by solving: $0 = P(x)$

This gives: $x = k_1, k_2, etc \ldots$

$(k_1, 0), (k_2, 0), etc \ldots$

Vertical asymptotes



The End Behavior

Graphing Rational Functions - General

To graph a Rational Function:
